Editorial – Protection of Human Subjects and Animals in Research

Luis Vicente Franco de Oliveira

Editor Chefe / Editor in Chief

Caros leitores,

Ao publicar resultados de experimentos com seres humanos, os autores devem indicar se os procedimentos utilizados estiveram de acordo com os padrões éticos do comitê responsável por experimentação humana (institucional e ou nacional) e com a Declaração de Helsinki de 1975, revista em 2008. Caso haja dúvida se a pesquisa foi conduzida de acordo com a Declaração de Helsinki, os autores devem explicar a razão para sua abordagem e demonstrar que o protocolo da pesquisa foi submetido a revisão ética institucional e aprovado, principalmente quanto aos aspectos duvidosos do estudo. Ao relatar experimentos com animais, os autores devem indicar se as orientações institucionais e nacionais para o cuidado e uso de animais de laboratório foram seguidas e também necessária a aprovação por um comitê de ética em pesquisa com animais. Sugerimos consultar o documento *Uniform Requirements for Manuscripts Submitted to Biomedical Journals: Ethical Considerations in the Conduct and Reporting of Research: Protection of Human Subjects and Animals in Research*.

Dear readers,

When reporting experiments on human subjects, authors should indicate whether the procedures followed were in accordance with the ethical standards of the responsible committee on human experimentation (institutional and national) and with the Helsinki Declaration of 1975, as revised in 2008 (5). If doubt exists whether the research was

conducted in accordance with the Helsinki Declaration, the authors must explain the rationale for their approach and demonstrate that the institutional review body explicitly approved the doubtful aspects of the study. When reporting experiments on animals, authors should indicate whether the institutional and national guide for the care and use

of laboratory animals was followed and must also be approved by an ethics committee on animal research. We suggest to read the document Uniform Requirements for Manuscripts Submitted to Biomedical Journals: Ethical Considerations in the Conduct and Reporting of Research: Protection of Human Subjects and Animals in Research.
